GUMIX ELASTOR

Rubber technical products manufacturer

For over 25 years Gumix Elastor Ltd. has been present on the market, tirelessly working on empowering processes, enhancing technology and expanding its global network of satisfied clients. We are progressively heading towards becoming one of the leading manufacturers of rubber technical products, agricultural and industrial machinery equipment, and utility.

Always striving to innovate and improve, we became a renewed brand with a continuous presence in over 20 European markets. Through our emerging platforms, we are able to react promptly and flexibly to global and local customer demands and meet them with excellence.

No matter the industry – be it in agriculture or utility, Gumix Elastor solutions increase the system efficiency. For the production, we handpick materials of the supreme quality and transform them into high-level performing products for your machinery. We provide our customers with leading-edge technology and deliver premium solutions and best-in-class tools and services. All of our processes take place in modern and fully equipped production facilities. As we continuously reinvent ourselves to stay competitive by challenging convention, we made sure our working environment stimulates 'out of the box' thinking and creativity.

PRODUCTS

Products for wide range of working conditions

Providing unparalleled quality and on-time delivery at competitive prices has been the hallmark of our company and policy leading to our success. With over 25 years of experience in manufacturing and 1000+ products developed, Gumix Elastor became an important source for the agricultural, construction and utility industry.

We strongly recommend the exclusive agricultural program where you can order custom-tailored items conforming to your specific requirements. Scroll through our agriculture product line to choose top quality long-lasting rubber tools and appliances that help to improve machine handling and provide users with comfort and fitting.

Check our wide selection of membranes, silent blocks, bumpers, carriers and more. Every article complies with our impeccable standard policy, so rest assured we will provide you with ideal solutions in terms of protection, convenience and flexibility.

AGRICULTURE

Gumix Elastor offers a wide product assortment for the effective seasonal preparation of your machinery. Ensure the optimal performance and smooth running by choosing the most compelling items from our product line or request a spare part for your device from our continuously growing inventory.

We abide by the 'perfection supersedes profit' philosophy, meaning we are devoted to developing faultless mechanical and maintenance solutions for the agricultural industry.

UTILITY

Excellent expertise and detailed test and optimization procedures help us design optimal solutions for diverse applications.

We pride ourselves for regularly following the latest market trends and developing innovation-centric programs to always stay up-to-date. Combining client feedback with professional recommendations of our field experts allows us to present you with continuous product updates.

INDUSTRY

Abiding by the standard of premium quality for designing and developmental production techniques, we adhere to the abundant experience collected across diverse industries and successful practices to provide you with top performing and reliable products and services.

A holistic approach, undivided individual attention and timely delivery kept our clients coming back – no matter the specialty or complexity. See for yourself how our methods translate into a great customer experience.

Rubber conveying roller

Whether you're upgrading your existing systems or building new conveyors, to ensure a damage reduction, Gumix Elastor offer includes a wide selection of rollers to be quickly and easily installed in your facility.

Rubber bumpers

Gumix Elastor offers an extensive inventory of top quality rubber bumpers in various sizes and shapes to help reduce shock and vibration while maintaining maximum protection and stability.

Rubber mats

A wide selection of rubber mats for various appliances. Gumix Elastor tough and durable mats represent a popular solution suitable for each industry – be it a manufacturing plant, car workshop or a gym.

Slide pads

Slide pads are recommended for the attainment of equal weight on both elements during work.

Composite blades for snow plow

Professional grade and high-quality snow plow blades make ice control and snow removal quite easy.

Rubber blades for snow plow

For quiet and efficient snow removal, rubber blades come in standard and custom shapes and sizes.

Production of rubber hand tools

Check out our new collection of non-slip rubber hand tools designed to bring the ultimate comfort and efficacy while making your job in the workshop or in the location extremely easy.

Rubber slip resistant floors

Holding high the primacy of 'safety first' policy, we produce non-slip safety mats for commercial and residential purposes.

Rubber vacuum cups

Various types of rubber vacuum cups used in the glass, ceramics and metal industries.

SERVICES

We provide you for every job

Whether you have an idea of perfect equipment that can help to refine your plant and boost your productivity, or a vision of an ideal product to complement your assortment, but you're still wondering how to materialize it, don't worry. Contact us and Gumix Elastor personnel will gladly work closely with you to bring your concept to life and provide you with useful consultation, information and recommendation.

Thanks to our wide collection of machinery and cutting-edge technology, we can offer our clients a variety of machine processing services, including turning, CNC processing, perforating, engraving, varnishing and plasma and laser cutting. In addition, we perform a warm and cold fusion of metal-rubber, aluminum-rubber and plastic-rubber services.

Mastering the art of design, test and production, we thrive on challenging ourselves to develop durable and reliable equipment. We consider customer satisfaction to be the measurement of quality. Merging human intelligence with state-of-the-art technology is key to guaranteeing consistent brand excellency.

Construction and development of product, tools and equipment

For the expert team of engineers and technologists, specialized exclusively in designing and construction of tools and products by using modern CAD/CAM software, every challenge poses the opportunity to find a new solution.

Whether you're an engineer, fabricator or a contractor, ensuring optimal productivity is a key to the success of your company. Using a modern CAD/CAM system is no longer a question of preference but an imperative. Employing professional CAD/CAM services performed by accomplished engineers is not only beneficial but crucial to your withstanding a test of speed and quality.

Implementing the right solution at the right time is essential for a company's progress and competitiveness in a local and international environment. Gumix Elastor organized team of engineers with multiannual expertise and full trend awareness can help you draw unique solutions and assist you with valuable suggestions to foster your growth and improve your sales by conquering new markets.

CNC machine material processing

Cut costs, generate revenue and save your time by employing our material processing services. We are aware one size doesn't fit each industry, so we specifically made sure our offer can cover a diverse and wide range of clients needs.

We are able to oversee large scale projects requiring teamwork and special attention regardless of size and complexity. If you're looking for a trusted partner to provide you with cost-effective processing services according to your specifications, request a quote and our team of project managers will respond promptly.

Laser cutting

Specializing in laser cutting of tin, pipes and profiles, we like to do fundamental work using contemporary, non-standard methods. Whether you're new to the industry or you're just looking to brush up your processes, we offer a top quality fiber laser technology.

Special beam of optical fibers is just a few μm thick, and in comparison to conventional CO₂ lasers, it allows easier, more stable and ultrafast cutting, allowing narrow kerfs even within wide working distances.

Tin bending

Tin bending is a complex and demanding process requiring high precision and accuracy. To simplify it, Gumix Elastor gathered a team of trusted engineers to meet each of our client's individual needs.

Sheet metal comes in a variety of shapes and sizes, and the number of ways to bend tin is as diverse and unique as the desired item. Some require force, some heat and some the combination of pressing, tearing and bending. Our business policy, proficiency and certified ISO 9001 quality management system reflect our professionalism and service excellency.

Rubber services

Producing rubber technical products is our specialty. We roll-out durable, reliable and supremely efficient rubber compounds for diverse industries. Our products come in groove shapes and different dimensions.

Designed to endure specific loads and pressure, they provide better grip, they are wear and abrasion resistant, highly flexible and suitable for use in all conditions. We aim to ensure the operational efficiency of your machines without compromising on functionality.

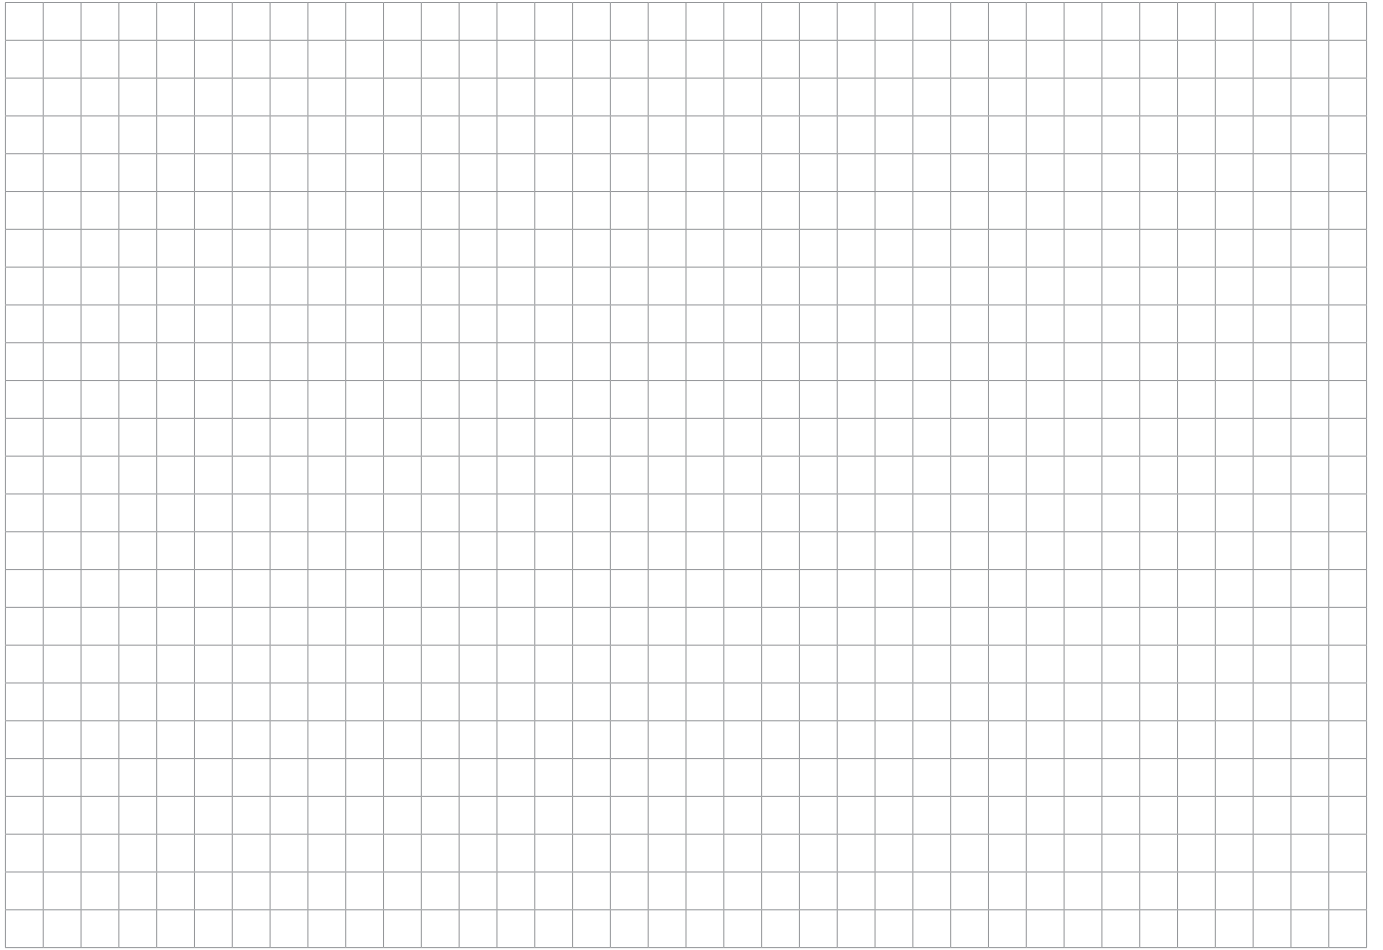

GUMIX ELASTOR

Proven quality and reliability

Always striving towards excellency, Gumix Elastor maintains a 'perfection supersedes profit' policy. Engaging with enthusiasm and passion into designing processes that reflect our commitment and competency, we guarantee that our products possess precision and supremacy specific to respectable mainstream brands in the rubber business. With an impressive growth outshining our humble beginning, we soon became a driving force for our region in the industry.

Cutting-edge technology, unparalleled technical service and timely delivery paved our way to success. Our mission is to build rewarding customer relationships and ensure the industry growth through intensive dialog with customers, integrity and devotion. Our vision is reflected in our philosophy. We aim to supply our clients with the best possible solutions promptly, responsibly and reasonably.

No matter the industry, Gumix Elastor solutions increase system efficiency. For the production, we handpick materials of the supreme quality and transform them into high-level performing products for your machinery. We provide our customers with leading-edge technology and deliver premium solutions and best-in-class tools and services. All of our processes take place in modern and fully equipped production facilities. As we continuously reinvent ourselves to stay competitive by challenging convention, we made sure our working environment stimulates 'out of the box' thinking and creativity.
